

7.62x39

30 PPC

7.62x39 Imp

As drawn, the 7.62x39 improved would use a PPC headspace gauge and reamer, with the reamer run in 0.125" deep. This leaves a short necked case and a chamber that will "clean out" a 7.62x39 chamber and still accept 7.62x39 ammo.
